HOW TO CONNECT YOUR DECODER

Take your entertainment experience to the next level with even more exciting Movies, Series and Kids shows with Openview model KSTB 6168.

First time boot up Connected to Universal LNB

Follow these simple steps if your previous STB was connected to the Universal LNB:

-  Your STB will download the HomeScreen data (about 4 minutes) and then display the Openview promo channel.
-  Activate your STB using USSD *120*6843*1# on your phone. It takes about 3 minutes for the Openview channels to appear.
-  Press **HOME** on your remote to check the HomeScreen info.
-  For **+More** content, connect to Wi-Fi: press HELP, then the green button. Select your Wi-Fi network and enter the password.

First time boot up Connected to Smart LNB or SATCR LNB

Follow these simple steps if your previous STB was connected to the Smart LNB or SATCR LNB:

-  Upon start -up the STB will display the Openview logo loading, followed by a **No Signal** message.
-  Adjust the LNB setting to SATCR. Press “0987” on the remote control to access the LNB setting menu, then switch the LNB To SATCR and initiate a **channel scan**. Once the scanning process is complete, the STB will automatically play the promo channel.
-  Activate your STB using USSD *120*6843*1# on your phone. It takes about 3 minutes for the Openview channels to appear.
-  Press **HOME** on your remote to check the HomeScreen info.
-  For **+More** content, connect to Wi-Fi: press HELP, then the green button. Select your Wi-Fi network and enter the password.

**A software upgrade will occur automatically at 1:30am, ensuring your STB has the latest version (higher than 1.6.2-144).*

Software version from factory: 1.6.2-136
